## Eastern Ontario Crop Diagnostic Day 2011 – July 19<sup>th</sup>

The Eastern Ontario Crop Diagnostic Day is a co-operative effort between the Ontario Ministry of Agriculture, Food and Rural Affairs, the Eastern Ontario Crop Advisory Committee and the Kemptville Campus, University of Guelph. The Diagnostic Day is an annual event held the 3<sup>rd</sup> Tuesday in July, designed specifically to improve the problem solving skills of seed, fertilizer and chemical industry personnel, agricultural consultants and farm managers. Certified Crop Advisor credits are available for most sessions.

The Eastern Ontario Crop Diagnostic Day provides growers and agri-business personnel with “hands-on” learning experiences to assist in the correct identification and treatment of crop problems common to eastern Ontario. The program provides a “real-world” environment where agriculturists can hone their crop trouble-shooting skills and evaluate new and alternative management strategies.

### This year’s topics included:

- Weed Identification
- Soybeans Management
- Spray Coverage vs. Travel Speed
- Corn Weed Control
- Weed Resistance Management
- Bio-energy and other Emerging Crops
- Nitrogen Management in Corn
- Spring Cereal Management
- Soybean Weed Control
- Tillage, Rotation and Soil Health
- Forages - Harvest management

Over 325 participants attended the Eastern Ontario Crop Diagnostic Day in 2011. Plan to join us Tuesday July 17<sup>th</sup> at the 2012 Eastern Ontario Crop Diagnostic Day.
