

## Crop Advances: Field Crop Reports

### Eastern Ontario Crop Diagnostic Day 2013 – July 16<sup>th</sup>

The Eastern Ontario Crop Diagnostic Day is a co-operative effort between the Ontario Ministry of Agriculture and Food/Ministry of Rural Affairs, the Eastern Ontario Crop Advisory Committee and the Kemptville Campus, University of Guelph. The Diagnostic Day is an annual event held the 3<sup>rd</sup> Tuesday in July, designed specifically to improve the problem solving skills of seed, fertilizer and chemical industry personnel, agricultural consultants and farm managers. Certified Crop Advisor credits are available for most sessions.

The Eastern Ontario Crop Diagnostic Day provides growers and agri-business personnel with “hands-on” learning experiences to assist in the correct identification and treatment of crop problems common to eastern Ontario. The program provides a “real-world” environment where agriculturists can hone their crop trouble-shooting skills and evaluate new and alternative management strategies.

#### **This year’s topics included:**

- Herbicide Injury
- Corn Physiology
- Soybeans Residue Management
- Forage Establishment
- Cereals Management Options
- Safeguarding Pollinators at Planting
- Cover Crops
- Fungicide Resistance
- Herbicide Resistance
- Sprayer Technology
- Diagnostic Challenge

Over 325 participants attended the Eastern Ontario Crop Diagnostic Day in 2013. Plan to join us Tuesday July 15<sup>th</sup> at the 2014 Eastern Ontario Crop Diagnostic Day.
