

## Crop Advances: Field Crop Reports

### Eastern Ontario Crop Diagnostic Day 2014 – July 15<sup>th</sup>

The Eastern Ontario Crop Diagnostic Day is a cooperative effort between the Ontario Ministry of Agriculture and Food/Ministry of Rural Affairs, the Eastern Ontario Crop Advisory Committee and the Kemptville Campus, University of Guelph. The Diagnostic Day is an annual event held the 3<sup>rd</sup> Tuesday in July, designed specifically to improve the problem solving skills of seed, fertilizer and chemical industry personnel, agricultural consultants and farm managers. Certified Crop Advisor credits are available for most sessions.

The Eastern Ontario Crop Diagnostic Day provides growers and agri-business personnel with “hands-on” learning experiences to assist in the correct identification and treatment of crop problems common to eastern Ontario. The program provides a “real-world” environment where agriculturists can hone their crop trouble-shooting skills and evaluate new and alternative management strategies.

#### This year’s topics included:

- Improving N Use Efficiency in Wheat
- Forage Diagnostics
- Effective Sprayer Cleanout
- Soybean Physiology and Fungicide
- N Strategies for Corn
- Pathogens Evolve!
- Early Season Soil Pests and IPM
- Herbicide Injury
- Crop Yield and Soil Health
- From Spoils to Soils
- Diagnostic Challenge

Over 300 participants attended the Eastern Ontario Crop Diagnostic Day in 2014. Plan to join us Tuesday July 21<sup>st</sup> at the 2015 Eastern Ontario Crop Diagnostic Day.
